Notes to Condensed Consolidated Interim Financial Statements

June 30, 2023 and 2022

(Unaudited and in Canadian dollars)

1. NATURE OF OPERATIONS AND LIQUIDITY RISK

SRG Mining Inc. is a Canadian-based mineral exploration and development business with activities in Africa. The Company was incorporated on April 16, 1996 under the *Canada Business Corporations Act*. The Company's common shares are listed on the TSX Venture Exchange (the "TSX-V") under the trading symbol "SRG.V". The Company's principal office is located at #132 – 1320 Graham Blvd., Mont-Royal, Quebec, Canada, H3P 3C8.

These condensed consolidated interim financial statements were authorized for publication by the Board of Directors on August 24, 2023.

The Company's mining properties are located in the Republic of Guinea ("Guinea"), Africa, and hence are subject to the risks normally associated with unanticipated changes in taxes and royalties, renegotiation of contracts, foreign currency fluctuations and political uncertainties.

As at June 30, 2023, the Company had a working capital of \$10.0 million, which included cash of \$10.2 million. Management of the Company believes that it has sufficient funds to maintain the status of its current obligations and keep its properties in good standing, to pay its ongoing general and administrative expenses and to meet its liabilities, obligations and existing commitments beyond the ensuing 12 months as they fall due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future. To continue the Company's future operations and fund its development expenditures, the Company will periodically need to raise additional funds, which may be completed in a number of ways, including, but not limited to, the issuance of new equity, debt financing or securing capital from potential partners. While management has been successful in securing financing in the past, there can be no assurance that it will be able to do so in the future or that these sources of funding or initiatives will be available to the Company or that they will be available on terms which are acceptable to the Company.

2. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed consolidated interim financial statements should be read in conjunction with the Company's audited annual financial statements for the year ended December 31, 2022.

The preparation of condensed interim financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies.

The Company has consistently applied the same accounting policies throughout all the periods presented in these condensed consolidated interim financial statements.

Basis of measurement

These condensed consolidated interim financial statements have been prepared on a historical cost basis using the accrual basis of accounting except for cash flow information.

Significant accounting policies

These condensed interim consolidated financial statements have been prepared following the same accounting policies and methods of computation as the audited annual consolidated financial statements for the year ended December 31, 2022.

SRG Mining Inc.

Notes to Condensed Consolidated Interim Financial Statements

June 30, 2023 and 2022

(Unaudited and in Canadian dollars)

Basis of consolidation

In addition to the Company, the condensed consolidated interim financial statements include all subsidiaries. Subsidiaries are all companies over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. Intercompany transactions and balances are eliminated upon consolidation. They are deconsolidated from the date that control by the Company ceases.

The subsidiaries of the Company, all of which are wholly owned, are as follows:

Subsidiaries	Jurisdiction of incorporation	Ownership %
Sama Resources Guinee SARL ("SRG Guinée")	Guinea	100%
SRG Graphite International Inc. ("SRG Intl")	Cayman Islands	100%
SRG Liberia Inc. ("SRG Liberia")	Liberia	100%
SRG Lithium Inc. ("SRG Lithium")	Canada	100%

3. EXPLORATION AND EVALUATION EXPENSES

The Company has one project currently under evaluation which is named Lola Graphite.

On August 10, 2018, the Government of Guinea awarded SRG Guinée, through ministerial order NoA2018/5349/MMG/SGG, the Lola Graphite research permit for a final two-year period, and, as per the legislation, the surface area was reduced to 94.38 square kilometers (from 187 square kilometers). This research permit has been canceled on November 6, 2019 when the mining permit has been issued.

On November 6, 2019, the Government of Guinea awarded SRG Guinée, through presidential order N°D/2019/291/PRG/SGG the mining permit for its Lola graphite project near the town of Lola in eastern Guinea, West Africa. The fifteen (15) year renewable permit was officially granted by the Government of Guinea through presidential decree number D/2019/291/PRG/SGG. The mining permit covers an area of 94.38 square kilometers. SRG Guinée has agreed to develop the mine and has an obligation to invest US\$110,000,000 within the first year of the permit being granted. The mining permit is subject to the general obligations of the Guinean mining code. In June 2020, the Company asked the Government of Guinea for a deferment due to the ongoing Covid-19 crisis. A number of events since its receipt of the mining permit, namely the COVID pandemic as well as a Coup d'État, each of which the Company considers being a Force Majeur event, rendered impossible the fulfillment of certain obligations by the Company during a significant period of time. Furthermore, on June 5, 2021, the Company and the government of Guinea signed an agreement which stipulates that the Company must begin work on its Lola project within six months of being formally reissued the Gogota permit. The Company remains in active dialogue with the government of Guinea about the development timeline for the Lola Graphite Project and intends to start early development works on the mining permit imminently.

SRG Mining Inc.

Notes to Condensed Consolidated Interim Financial Statements

June 30, 2023 and 2022

(Unaudited and in Canadian dollars)

The fair value of stock options granted was determined using the Black & Scholes valuation model based on the following weighted average assumptions:

	Six-month period ended June 30, 2023	Year ended December 31, 2022
Weighted average price at the grant date	-	\$0.70
Weighted average exercise price	-	\$0.70
Expected dividend	-	-\$
Expected average volatility	-	134.95%
Risk-free average interest rate	-	1.70%
Expected average life	-	10 years
Weighted fair value per stock option	-	\$0.68

A share-based payment expense of \$36,977 and \$116,978 was recognized during the three and six-month periods ended June 30, 2023 respectively (\$111,546 and \$459,727 during the three and six-month periods ended June 30, 2022) in share-based compensation in the condensed consolidated statement of loss and comprehensive loss. The expected underlying volatility was based on the historical comparable companies shares over a period equivalent to the expected average life of the options.

Deferred share units

The Deferred Share Units (“DSU”) plan provides for the payment of directors’ compensation with DSUs. Each DSU is a right granted by the Company to an eligible director to receive an equivalent of the value of one common share on termination of service. The Company may make payments due under the DSU Plan by issuing one common share for each DSU. The number of DSUs to be granted under the DSU Plan is determined by dividing the director’s compensation by the average closing price of the common shares on the TSXV, for 5 trading days immediately preceding such date. Under the DSU Plan, a maximum number of common shares available and reserved for issuance is 22,764,466 shares of the Company, less any shares reserved for issuance under the Plan and the RSU Plan.

The following table summarizes the changes in DSUs issued during the three-month period ended June 30, 2023:

	Six-month period ended June 30, 2023		Year ended December 31, 2022	
	Number	\$(³)	Number	\$(³)

Balance, end of year	382,163	0.70	382,163	0.70

(3) Weighted average fair value.

Restricted share units

The RSU Plan provides for a maximum number of common shares available and reserved for issuance to 22,764,466 shares of the Company, less any shares reserved for issuance under the Plan and the RSU Plan. The RSUs are time-based awards and all the amount of RSUs granted will vest upon the continuous employment of the Participants on the third anniversaries of the RSU grant, starting from the date of the grant or such other period not exceeding three years determined by the Board of Directors.

Pursuant to the terms of the RSU Plan, Participants will receive, upon vesting of the RSUs, common shares of the Corporation issued from treasury. The outstanding RSU’s as at June 30, 2023 are as follows:

8. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a flexible capital structure, which will allow it to pursue its exploration & evaluation activities and develop the mine.

The Company considers its capital structure to include shareholders' equity, debts and convertible debentures. The Company monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets and capital markets. In order to facilitate the management of capital and the exploration and evaluation of its exploration & evaluation assets and develop the mine, the Company prepares annual expenditure budgets, which are monitored and updated as considered necessary.

To maintain or adjust the capital structure, the Company may issue new equity if available on favorable terms, issue more debts or convertible debenture instruments, sell off permits and enter into joint venture arrangements.

The Company is not subject to externally imposed capital requirements. There has been no change in the Company's approach to capital management during the period ended June 30, 2023.

The changes in the Company's capital are disclosed in the consolidated statements of changes in shareholder's equity.

9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK FACTORS

Classification

The Company's financial instruments as at June 30, 2023 and December 31, 2022 consist of cash and cash equivalents, receivable and other current assets, accounts payable and accrued liabilities.

The classification of financial instruments is summarized as follows:

SRG Mining Inc.

June 30, 2023 and 2022

(Unaudited and in Canadian dollars)

Financial Assets	Classification	June 30, 2023	December 31, 2022
		\$	\$
Cash and cash equivalents	Financial assets at amortized cost	10,199,331	11,106,401
Other receivables	Financial assets at amortized cost	-	339
		10,199,331	11,106,740

Financial Liabilities	Classification	June 30, 2023	December 31, 2022
		\$	\$
Accounts payable and accrued liabilities	Financial liabilities at amortized cost	254,773	649,551
		254,773	649,551

The Company's risk exposures and the impact of these exposures on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit concentration risk by holding cash and cash equivalents. This risk is minimized by holding cash and cash equivalents balances with large Canadian financial institutions and a minimal amount with local banks in Africa.

Liquidity risk

The Company manages its liquidity risk by using budgets that enable it to determine the amounts required to fund its E exploration & evaluation programs. The Company also ensures that it has sufficient working capital available to meet its day-to-day commitments.

As at June 30, 2023 the Company had cash and cash equivalents of \$10,199,331 to settle current liabilities of \$433,218.

Any funding shortfall may be met in the future in a number of ways including, but not limited to, the issuance of new equity instruments, issuance of debts, issuance of convertible debentures, further expenditure reductions, or other measures.

Fair value

Fair value estimates are made at the consolidated statement of financial position date based on relevant market information and other information about financial instruments.

The Company's financial instruments as at June 30, 2023 consist of cash and cash equivalents, accounts payable and accrued liabilities. The Company's financial assets and financial liabilities approximate their fair values due to their relatively short periods to maturity.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing market interest rates.

Except for the fixed interest recognized on the convertible debenture and short-term loan, all of the Company's assets and liabilities are non-interest-bearing and, as such, are not subject to a significant amount of risk arising from fluctuations in interest rates.

Market risk

Foreign exchange risk

Currency risk is the risk that future cash flows or fair value of financial instruments will fluctuate because of changes in foreign exchange rates. The Company is exposed to foreign exchange ("FX") risk as cash is primarily held in Canadian dollars, while a significant portion of expenditures are denominated in US dollars and Guinean francs and, to a lesser extent, euros, Australian dollars and British pounds.

	June 30, 2023 in CAD	Impact of 10% change in FX	December 31, 2022 in CAD	Impact of 10% change in FX
United States dollar	1,097,936	+/- 109,794	41,009	+ / - \$4,101
Guinea franc	133,447	+/- 13,345	119,602	+ / - \$11,960
British pound	-	-	3,695	+ / - \$370

Commodity price risk

Commodity price risk is the risk that the fair value or expected future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and other currencies, as outlined above. As the Company has not yet developed commercial mineral interests, the Company is not a party to financial instruments exposed to the price of commodities. However, the Company is indirectly exposed to commodity price risk, as it impacts the Company's access to capital and funding.
